

Excellencies, Distinguished guests, Ladies and gentlemen,
It's my great pleasure to celebrate the 10th anniversary of the establishment of Torishima Service Solutions FZCO. I also congratulate the successful extension of the company's new Dubai facility. Today, I'm so proud Torishima is a very Japanese company which has Japanese prime virtue.

For example, take a look at the company's logo which can be seen there. It shows something inside a circle. A few weeks ago, I learnt the inside shows a bird and the outside circle indicates an island. In Japanese, a bird is Tori, and an island is Shima. It's simply Tori-Shima, that's a company name. It's too simple? Of course, Japanese culture tends to respect elegant simplicity. But I want to say, this logo demonstrates Japanese technologies are flying from the island state, Japan, to the world, in order to contribute the global prosperity. Definitely, Torishima has done such a contributions towards the world prosperity through its state of technologies and services. It's very Japanese virtue.

In a meantime, honestly speaking, I didn't know well about the Torishima, even though it originally started the business in Osaka, my home town. But, this is very Japanese virtue, which contributes the global prosperity behind the scene. Everyone knows the main products of Torishima is a pump. Then, think about our human body. We have a pump. Definitely, it's a heart, pumping the blood all around our body, 24 hours a day, 7 days a week, every moment, every day, very humbly behind the scene. Torishima is such a company which supports our inevitable life line without awareness.

So, wherever and whenever we see our society's backbone, such as fresh water production, sewage and drainage system, agricultural field, chemical plant, and any type of power station, Torishima performs an indispensable role in our daily life without awareness.

In addition, for our prosperous life, a maintenance of pump is crucially important, like a care of our healthy body. Such crucial maintenance role has been played by this company, Torishima Services Solutions. In the Middle East, there are over 7,000 Torishima pump units installed last 30 years. Without Torishima Service Solution, no unit can keep the Torishima's pride, super efficient performance. But, surprisingly enough, in our usual life, we can never notice any thing about such excellent maintenance services provided by Torishima Services Solutions. It's very Japanese virtue; inevitable contributions in our society behind the scene.

Ladies and gentlemen,

Torishima produces high-efficient super-effective pump, which contributes huge energy savings. In the company's homepage, I was astonished the Torishima engineers make every effort to achieve further energy saving even another 0.1%. Amazing, isn't it. This disciplined spirit has been accepted all over the world including here in the Middle East.

I strongly hope the further great success of the Japan's pride, Torishima Service Solutions, with the new Dubai facility. Thank you very much.
